PRODUCT DESCRIPTION

The FBT DJ15A, ideal for many applications of modern DJ, yet rugged gas injected molded polypropylene cabinet construction. Available in black finish the FBT DJ15A series speakers modern cabinet appearance provides fixed installations with an elegant design that blends into any decor. The asymmetrical shape of the FBT DJ15A cabinet also allows use as a powered floor stage monitor. The FBT DJ15A is of two way design incorporating an 15" low frequency woofer and 1" HF custom compression driver coupled to a 90°H x 60°V horn. The active internal crossover is at a fixed frequency of 1.8kHz. With a frequency range of 48Hz - 20kHz the FBT DJ15A speakers provide high fidelity sound for both speech and music applications with a maximum SPL of 129dB. A front face steel grille protects the speaker from external damage. The bi-amplified FBT DJ15A active speaker feature a 350W RMS low frequency amp and a 100W RMS high frequency amp. The control panel features two channels input mixer with stereo/mono out; XLR/jack input and XLR link, mic/line switch, level, HP filter, 4 preset switch, stereo RCA input, XLR out for dasy-chaining with stereo/mono switch selector. The two M10 fly points built into the cabinet along with the optional mounting brackets allow the FBT DJ15A speaker to be surface mounted on walls or ceilings. A standard 1,38" speaker stand socket allows the FBT DJ15A to be mounted on speaker stand.
